

INTERNATIONAL PYTHON OLYMPIAD 2026

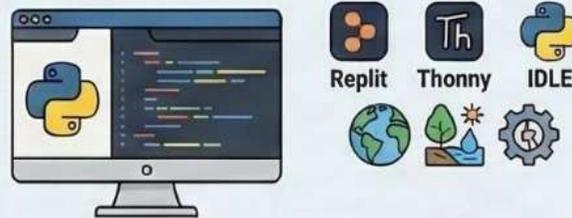

Step 1: Join the Right Category

Participants must enter as individuals in one of four age groups: Beginner, Junior, Middle, or Senior.

Step 2: Develop Your Python Project

Build an original project using Python editors like Replit, Thonny, or IDLE that aligns with the competition's themes.

Step 3: Record a Video Walkthrough

Create a 2-3 minute video explaining your project's purpose, its connection to the theme, and the key coding logic used.

Step 4: Register and Submit by July 15

Complete the online registration form, pay the \$15 USD fee, and upload your .zip file or Google Drive project link.

Step 5: Professional Evaluation

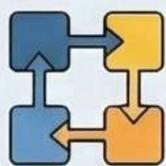

Projects are judged on a 100-mark scale, including 20 marks for the video presentation and 20 marks for coding logic/functionality.

Step 6: Results and Recognition

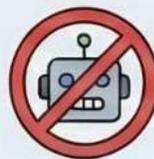

Results are announced within 60 days of the deadline; participation certificates are emailed, and trophies/medals are shipped to schools within three months.

Recommended Project Levels

Beginner: Number Games
Junior: Quiz Games
Middle: Task Managers
Senior: AI/Chatbots

Avoid Automatic Disqualification

AI-generated code Plagiarism **AFTER JULY 15**
 Plagiarism, uncredited AI-generated code, or submitting after the July 15 deadline.

Mandatory Documentation

School ID Birth Certificate Passport **<1MB**
 You must upload a school ID, birth certificate, or passport during registration to verify age.
